ABI with Toe for diabetic patients

Diagnosing Vascular Disease for over 30 years

SIMPLE | INTUITIVE | EFFECTIVE

Reimbursable systems for the Diagnosis of PAD

YOUR PATIENTS TRUST YOU

Undiagnosed PAD carries a 25% chance of heart attack, stroke, amputation, or death in 5 years!

HANDHELD SIMPLEABI SYSTEMS

Newman Medical's handheld simpleABI Systems stand above others for their ease of use in office settings. Pulse volume recording (PVR) is easier to use, user independent, and gives a more comprehensive view of extremity blood flow*. Portable, easy to use, clinically accurate. Choose handheld simpleABI systems for your practice.

MAINTAIN THEIR TRUST

- Find your patient's PAD before they have a heart attack or stroke
- 25% will have an MI, stroke, amputation or death within 5 years

YOU HAVE MORE PAD PATIENTS THAN YOU REALIZE

- 20% - 30% of those over age 65 and diabetics or smokers over age 50 have PAD
- Many don't realize they have PAD, thinking it is arthritis or other leg pain
- Over half are undiagnosed

WE MAKE IT EASY

- Most common customer comment: "I can't believe it's so easy"
- Easy to follow test right on the screen
- Immediate full page printing, communicating results

YOU CAN CHANGE THESE OUTCOMES

- More pharmaceutical options continue to come to market
- Exercise therapy is effective and is now reimbursable
- New intervention techniques effective, easier on the patient
