

INTRODUCING THE STEADYDOP VASCULAR DOPPLER PROBE: CONFIDENCE IN EVERY VASCULAR ASSESSMENT

Finally, a vascular Doppler probe that delivers the accuracy and reliability you need. The SteadyDop from Newman Medical is engineered to eliminate the frustration of probe movement during critical ABI testing.

Experience a new level of precision with a probe designed for stability, comfort, and seamless integration with your existing Newman Medical equipment.

Here's how SteadyDop transforms your vascular assessments:

- **Eliminate Movement Errors:** The revolutionary stethoscope-like grip eliminates movement errors, delivering consistently accurate readings even during extended assessments.
- **Built-in Optimal Angles:** Forget angle guesswork. The SteadyDop's masterfully engineered design ensures perfect positioning for instant artery detection every time.
- **Wide Sensors for Easy Tracking:** Quickly find and maintain contact with the artery, thanks to the SteadyDop's wide, sensitive sensors.
- **Universal Compatibility:** Seamlessly integrate the SteadyDop with your existing Newman Medical DigiDop Dopplers and SimpleABI systems.
- **Diagnostic Confidence:** Experience dramatically reduced ABI measurement errors and gain complete trust in your vascular assessments and clinical decisions.
- **Enhanced Comfort:** The SteadyDop's comfortable design minimizes pressure on the patient, preventing discomfort and vascular flow disruption.

Ideal for:

- Primary care practices | Novice to expert Doppler users | Professionals expanding diagnostic capabilities

NEW

PRODUCT PROMOTION

Upgrade Your ABI Testing & Get a SteadyDop probe at NO EXTRA CHARGE!

Purchase any new Doppler-based simpleABI system and receive a free SteadyDop vascular probe (in addition to the system's standard accessories). **Eligibility:** New simpleABI system buyers and those who purchased within the last year. Customers with systems bought over a year ago receive \$100 off the list price. This offer can be combined with the trade-in promotion.

Redemption Period: May 1, 2025 – September 30, 2025 (may be extended or terminated at Newman Medical's discretion). The SteadyDop probe will ship separately after the redemption form is submitted and verified upon receipt of the new system.

FAST, ACCURATE, AND CONFIDENT PAD TESTING WITH STEADYDOP.

The perfect companion for your simpleABI Cuff-Link or manual simpleABI system.

simpleABI
Manual Systems

simpleABI-Q utilizes PVR technology, eliminating the need for a probe in PAD detection.

Excellent Reimbursement

Vascular testing is reimbursed through fee-for-service, risk adjustment in managed care, and direct payment in concierge practices and screening. A typical practice can generate a significant return on investment.
